

# Topic

Analyzing the most frequently used words in social media posts, categorized by the 16 MBTI types using NLP techniques.

Columbia University

# Introduction

## MBTI:

A personality test. It is a personality type system that divides everyone into 16 distinct personality types across 4 axis:

Introversion (I) – Extroversion (E)

Intuition (N) – Sensing (S)

Thinking (T) – Feeling (F)

Judging (J) – Perceiving (P)

## MBTI Personality Test

Columbia University

# Dataset

- Contains over 8,600 rows of data
- Each row is a person's:
  - MBTI Type
  - Last 50 things they have posted

# Models

	Logistic Regression	Random Forest	XGBoost	SVM
Accuracy	0.69	0.48	0.65	0.67

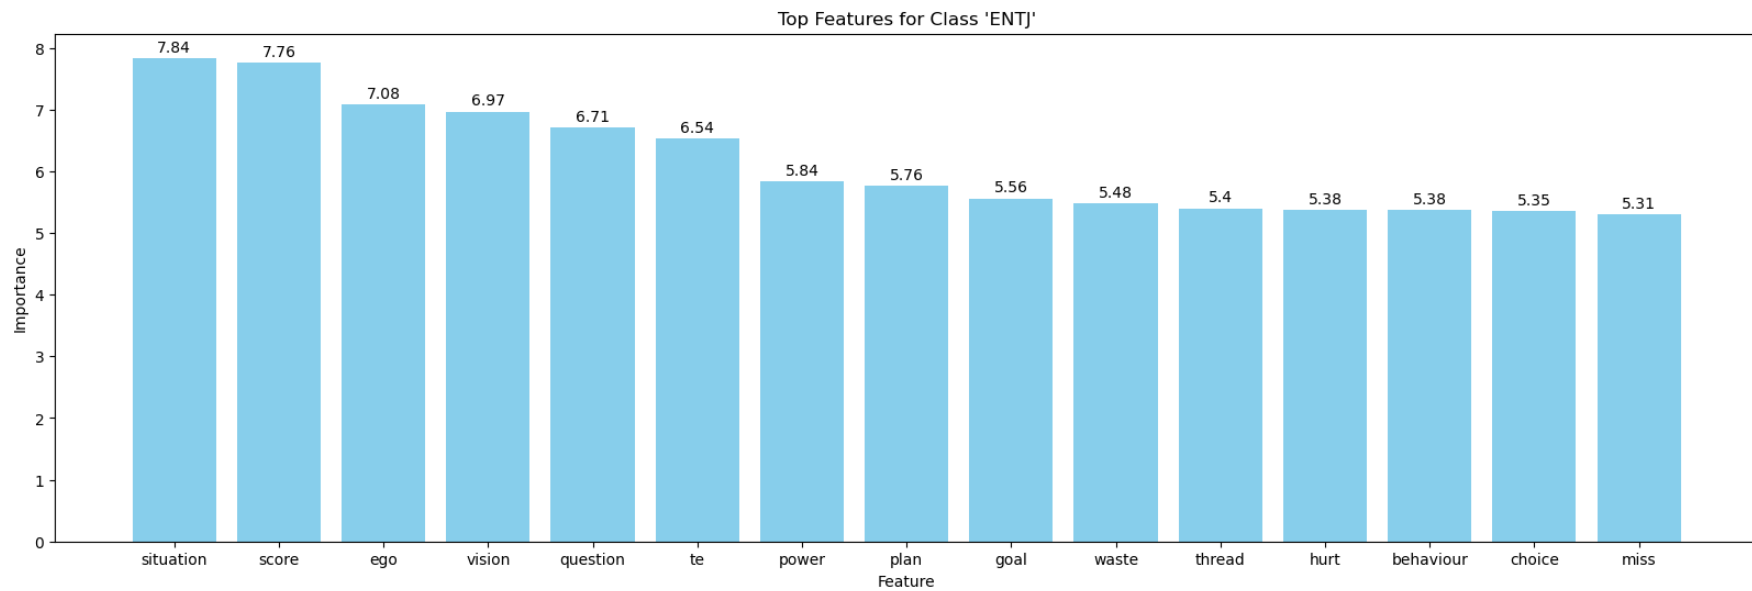

Columbia University

# Hyperparameter Tuning

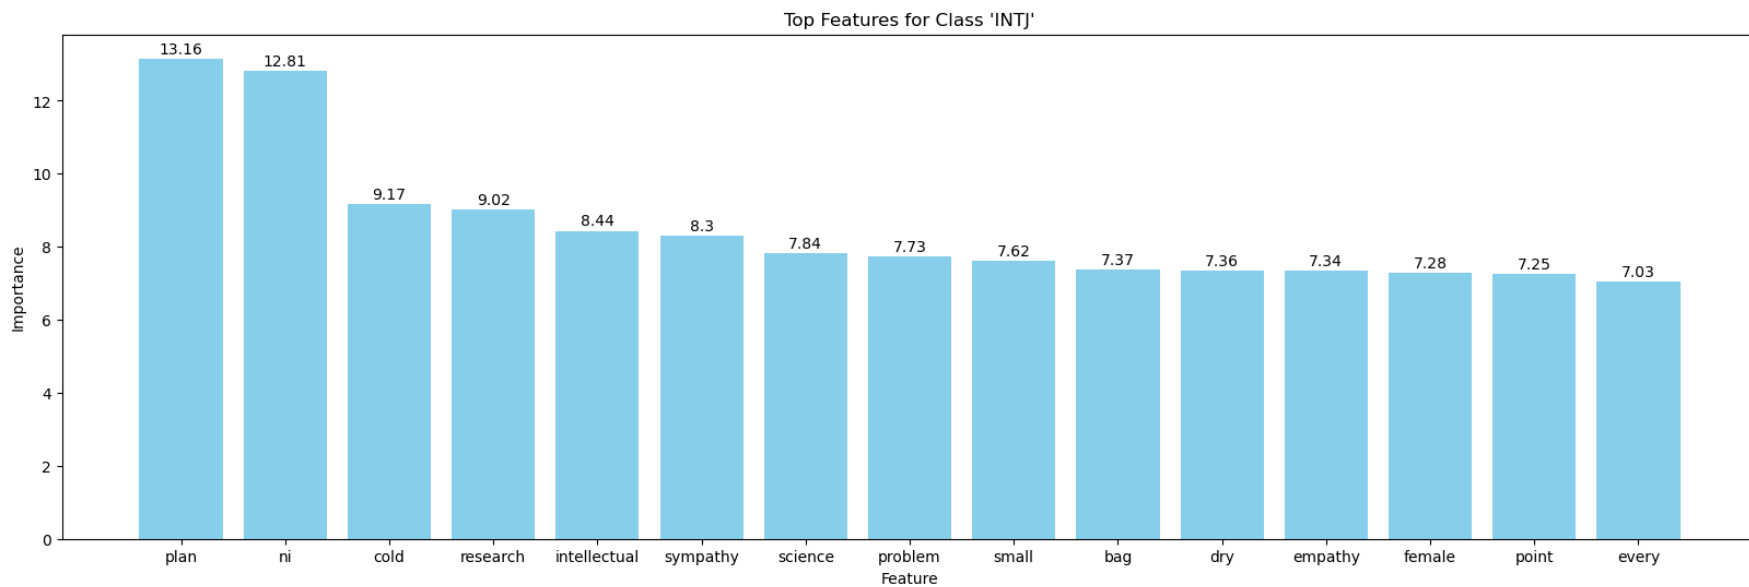

- Logistic Regression (highest accuracy)
- Using RandomsearchCV
- Performance improved

# Results - ENTJ

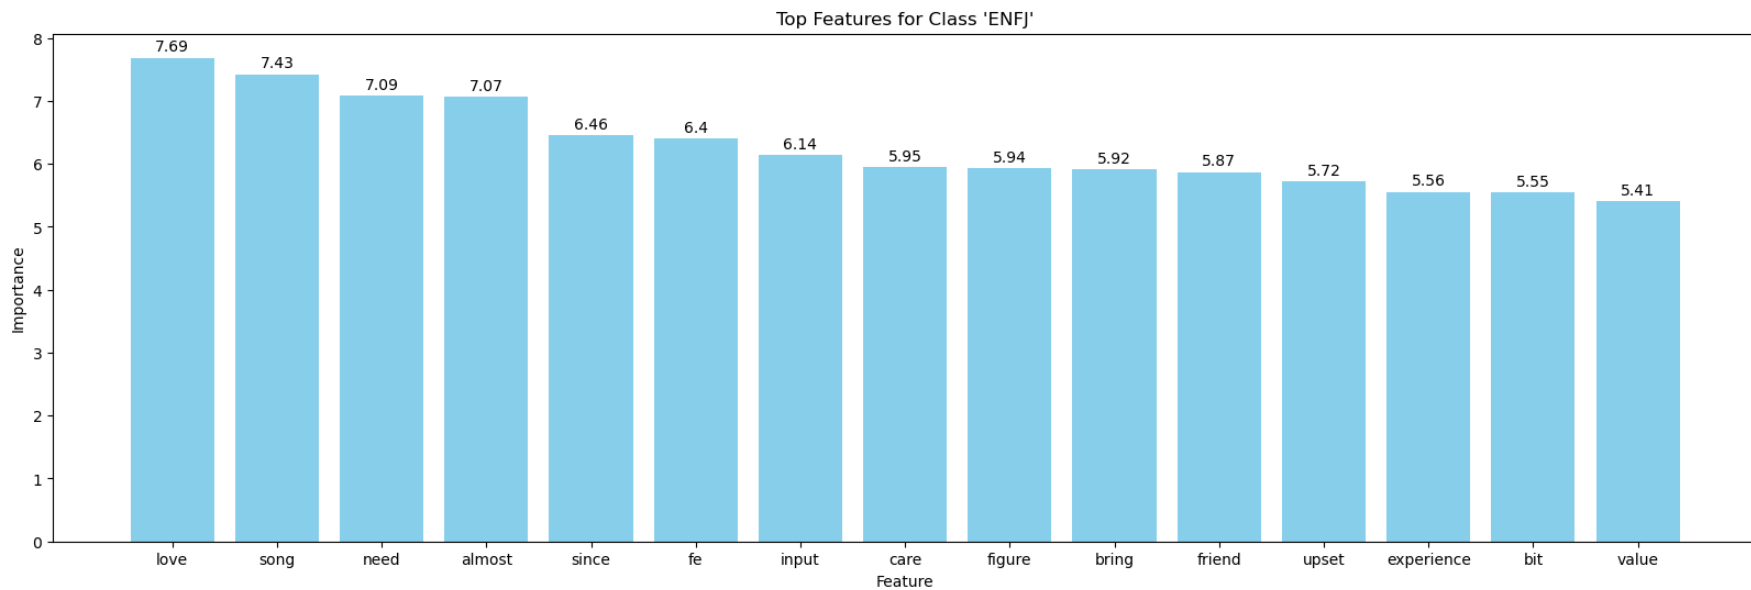

# Results - INTJ

Columbia University

# Results - ENFJ

# Applications

01

Enhanced Personalization

02

Improved Communication Strategies

03

Human Resource Development

04

Mental Health Support
